

Delta Electronics acquires Delta Controls Germany GmbH to strengthen its building automation system integration capabilities in Europe

Delta Electronics, Inc. (“Delta”), a leading provider of energy management and smart green solutions, announced today that it has entered into a definitive agreement to acquire Delta Controls Germany GmbH through its subsidiary Delta International Holding Limited B.V. (DIH). The transaction strengthens Delta's system integration capabilities and creates significant synergies across the sales and service channels for its building automation solutions business.

Hong Wu, General Manager of Delta's Building Automation Business Group said, “Smart buildings and smart cities are pivotal to sustainable development and represent a core strategic focus for our company. With over two decades of deep expertise in building automation business and system integration, Delta Controls Germany has collaborated with us to successfully deliver building automation solutions. With Delta Controls Germany joining, we look forward to creating even more value for our customers through excellent system integration and services.”

Dusko Lukanic-Simpson, Managing Director of Delta Controls Germany GmbH said, “Intelligent buildings play an increasingly important role in today’s market, given their energy-saving potential. We have been providing Delta’s building automation offerings to a wide range of industries in Europe through our System integration services and sales channels for years. Through this transaction, we will unlock greater synergies by leveraging the Group’s comprehensive solution portfolio and market resources to better fulfill our customers’ diversified needs.”

Delta Controls Germany GmbH was founded in 2005. The company specializes in solutions for system integration in building automation. It has partnerships with over 50 system integrators in Germany, Austria, Switzerland, Spain, and Portugal. Thanks to its strong system integration expertise, it enables the seamless integration of subsystems from different manufacturers in the areas of HVAC, energy, security, and building management, supporting a wide range of sectors, including commercial offices, public institutions, education, healthcare, industrial facilities, and retail environments.
